

An exciting opportunity for a UX/UI Designer to join WatchFit's Budapest office.

Who we are?

A dynamic UK based startup that has launched a superb new fitness and nutrition based app and information resource that is already getting tremendous international attention.

We are an international and vibrant team who share a passion for healthy living, fitness, sports, technology, games and having fun! WatchFit is a gamified marketplace for health and fitness offered for mobile and the web.

Besides turning exercise and diet into a fun, motivating and inspiring game, our app provides a platform for fitness experts, nutritionists and other health professionals to convey their expertise, raise their profile and sell their products and services.

Our dynamic agile development team is co-located in Budapest, currently undertaking the project to devise, build and deploy a suite of applications encompassing both server and client-side components.

What are we looking for?

We're looking for a motivated, ambitious and passionate UX Designer who open to new challenge in a truly exciting, developing and proven market.

Required skills & experience:

- You will have been working as a UX/UI designer for at least two years
- Knowledge and experience of designing UX/UI solutions for the web and mobile apps
- Extensive experience working with Adobe Photoshop, Illustrator and InVision
- Good understanding of the latest design technology
- Strong knowledge and understanding of web and app design principles
- Excellent HTML5, CSS3 skills
- English communication skills, ability to work in an international environment

Desired skills & experience:

- Experience working with version control systems (Git), issue tracking (Jira, Confluence)
- Experience with Adobe InDesign and Microsoft Office

Knowledge of the following is a big plus:

- Experience with web services, technologies, standards and communication protocols
