

An exciting opportunity for an iOS Developer to join WatchFit's Budapest office.

Who we are?

A dynamic UK based startup that has launched a superb new fitness and nutrition based app and information resource that is already getting tremendous international attention.

We are an international and vibrant team who share a passion for healthy living, fitness, sports, technology, games and having fun! WatchFit is a gamified marketplace for health and fitness offered for mobile and the web.

Besides turning exercise and diet into a fun, motivating and inspiring game, our app provides a platform for fitness experts, nutritionists and other health professionals to convey their expertise, raise their profile and sell their products and services.

Our dynamic agile development team is co-located in Budapest, currently undertaking the project to devise, build and deploy a suite of applications encompassing both server and client-side components.

What are we looking for?

We are looking for talented iOS developers to join us in this exciting work. A successful candidate must be able to hit the ground running by demonstrating expert skills and knowledge, enabling him/her to take ownership of iOS components.

Required skills & experience:

- Very strong knowledge of the Objective-C
- Experience working with UI using Storyboards
- Familiar with iOS Development best practices
- Familiar with multithread programming
- Knowledge of memory management
- Must be able to talk about and potentially present previous work published in the Apple App Store
- Experience with web services, technologies, standards and communication protocols
- English communication skills, ability to work in an international environment

Desired skills & experience:

- Experience working with version control systems (Git), issue tracking (Jira, Confluence)
- Good understanding of security principles
- Experience in Unit Testing
- Experience in Continuous Integration
- Experience in CocoaPods
- Strong sense of system architecture relates to mobile development

Knowledge of the following is a big plus:

- Linux experience
- Knowledge of PHP and MySQL
- PHP frameworks (Yii, Symfony)
- NoSQL systems (e.g. MongoDB)
- Swift programming language
